

PLF in association with Talking Point presents

ADVANCED 3D

The National Stereoscopic 3D Training Programme

25th, 26th and 27th January 2011
BAFTA and Twickenham Studios
www.advanced3d.co.uk

"Phil Streater knows as much about 3D as anyone else I've met in the UK, but what's more important, he knows how to explain it! This course sounds great."

Sam McCurdy BSC, Director of Photography
Street Dance, Horrid Henry

A 3 day series of intensive workshops and hands on seminars for industry professionals - by industry professionals.

With special guests and 3D experts, the programme will be led by 3D producer and trainer Phil Streater. Phil's production credits include *Bugs!* in IMAX 3D, *London Eye 4D Experience*, *Carmen in 3D* for RealD and Royal Opera House and *Meerkats 3D* with OSF for National Geographic/SKY. Phil has run 3D masterclasses at NAB Las Vegas, IBC Amsterdam, Edinburgh International Film Festival, Wildscreen Film Festival, Jackson Hole Film Festival, HFF Potsdam and 3D Masters BAFTA.

Day One will be held at BAFTA for a maximum of 220 attendees. It will cover everything you need to know in order to decide if your project is right for 3D; whether it's a feature film, commercial, high end documentary or an 'as live' concert. And, if it is right, which rig you should use and the impact your decision has on design, post production, the budget and schedule. There will be networking drinks and a 3D screening at the end of the day.

Days Two and Three will be held at Twickenham Studios (Stage 1) for a maximum of 35 attendees: DoP's, AC's, VFX Supers, Editors, Directors and Producers. Attendees on these days will need to have attended Day One. The focus on these days will be intensive, practical 3D movie making, using all the major 3D rigs, monitoring, recording and post production tools, provided by On Sight, Telegenic, SGO Mistika and Mytherapy. There will be networking drinks and 3D screenings on both days.

Fees - deadline 14th January 2011

Day One only - £250 (+VAT), All three days - £750 (+VAT)
